

**SELF-SERVICE | ASSISTED-SERVICE | FULL-SERVICE**  
**ONE SOLUTION**

**THREE SIZES**

As the cost of branch transactions soar, what is the best way to migrate to more efficient channels while still delivering a personal touch? Introducing the NEXT evolution in banking—an uncompromising vision of high-tech, high-touch self-service for today’s branch. NEXT isn’t just a glorified ATM with a new surround, but a completely different approach to branch banking. Fully core integrated, NEXT automates low value transactions while putting the power of conversations, engagement, and assistance in your associates’ hands with a savvy tablet interface.

Replicating many of the services a teller can deliver, both members and staff can use NEXT to drive transactions—truly combing self-service, assisted-service and full-service into one kiosk. Plus, with future flex options built right in, start with NEXT1 for basic teller functionality and easily upgrade to NEXT2 or NEXT3 with a cash recycler for more robust transaction sets.

**AUTOMATE WITHOUT COMPROMISE  
WITH THE NEXT EVOLUTION IN BANKING.**

## TABLET INTERFACE

- Available on all NEXT platforms
- Receive real-time activity notifications
- View of all kiosks in the branch
  - Status and use
  - Alerts for assistance
- Handle overrides and approvals
- Takeover transactions to assist members “hip to hip”
- Reprint transaction receipts
- Manage kiosk maintenance and troubleshooting
- Secure teller authentication
- Available in a web app for full portability

Whether you choose NEXT1, NEXT2 or NEXT3, all are more powerful than anything that's come before. Self-Service, Assisted-Service, Full-Service in one solution. **In a word, brilliant.**
